

DISCLOSING TABLETS (REDCOTE)

*Disclosing tablets are used to detect plaque present on teeth.

DIRECTIONS FOR USE:

1. First brush teeth and rinse.
2. Chew one tablet and swish around all teeth for approximately 30 seconds then expectorate (spit). Be sure to include the inside, outside, front and back of all teeth. **Remember to expectorate (spit) and do not swallow excess.**
3. Rinse with water.
4. After thoroughly rinsing teeth, observe all areas that remain **RED**, which indicates the presence of plaque.
5. Remove remaining plaque with thorough brushing and flossing.
6. Use monthly for plaque identification.
