

## **PRESCRIPTION STRENGTH TOOTHPASTE 1.1% PLUS**

- Contains 5 times more fluoride than regular toothpaste.
- If used regularly and as directed it is effective in preventing decay.
- Use at night in place of your regular toothpaste unless instructed to use more often.
- 1.1+ helps to prevent re-infection of gum disease, inhibits formation of plaque, helps with gum line sensitivity, and helps control acid-producing bacteria that cause decay and tooth erosion.

### **DIRECTIONS FOR USE:**

- Cover toothbrush head with 1.1+ and brush all surfaces including gum line for at least 1 minute
- Spit out toothpaste and DON'T eat or drink for 30 minutes
- See manufacturer's instructions for complete information
