

DISCLOSING TABLETS (REDCOTE)

*Disclosing tablets are used to detect plaque present on teeth.

DIRECTIONS FOR USE:

1. First brush teeth & rinse.
2. Chew one tablet & swish around all teeth for approximately 30 seconds then expectorate (spit). Be sure to include the inside, outside, front & back of all teeth. Remember to expectorate (spit) & do not swallow excess.
3. Rinse with water.
4. After thoroughly rinsing teeth, observe all areas that remain RED, which indicates the presence of plaque.
5. Remove remaining plaque with thorough brushing & flossing.
6. Use monthly for plaque identification.
